MODEL 8355

7 Day Programmable 2 Heat / 2 Cool Heat Pump

User's Manual Installation and Programming

Important Safety Information Warning:

- Always turn off power at the main power source by unscrewing fuse or switching circuit breaker to the off position before installing, removing, cleaning, or servicing thermostat.
- Read all of the information in this manual before installing or programming this thermostat.
- This is a 24V AC low-voltage thermostat. Do not install on voltages higher than 30V AC.
- All wiring must conform to local and national building and electrical codes and ordinances.
- Do not short (jumper) across terminals on the gas valve or at the system control to test installation. This will damage the thermostat and void the warranty.

Assistant Editor Janne Liu. This new series from Uniden now enables you to dial and receive mobile calls on the cordless handset for convenience and versatility as well as charging your Mobile Phone simultaneously. When a Power Failure occurs, the charged handset temporarily supplies power to the base unit. You can then make and receives calls using a handset. The high gain antenna allows for greater range and to eliminate dropout areas in your home. This model also comes with a Long Range Repeater to extend your range even further. What makes this phone so

special is it allows you to call conference both your mobile call and landline call on the one phone. It is fully submersible in the Pool and

This garage door opener has been designed and tested to offer safe service provided it is installed, operated, maintained and tested in strict accordance with the instructions and warnings contained in this manual. The instructions for these accessories will be attached to the accessory and are not included in this manual. The images throughout this manual are for reference and your product may look different.NOTE ONLY use the bolts removed from the garage door opener. Place the garage door opener on the packing material to prevent scratching. 1.1 Remove bolt and lock nut from the top of the garage door opener. Nut ring slotNut Ring. Nut Ring. Follow the instructions which will work best for your particular requirements. Do not install the header bracket over drywall. If installing into masonry, use concrete anchors not provided. Slide the outer trolley toward the garage door opener. The trolley can remain disconnected until instructed. This bracket and fastening hardware are not provided. For the vertical brace, 2 pieces of angle iron are used to create a Ushaped support. The best solution is to check with your garage door manufacturer for an opener installation door reinforcement kit. The trolley will reengage automatically when the garage door opener is activated. To insert or release wires from the terminal, push in the tab with screwdriver tip. The garage door opener will not go into the sleep mode until the garage door opener has completed 5 cycles upon power up. If the door track will not support the sensor bracket a wall installation is recommended. Choose one of the following installations. Not Provided. White. Safety reversing sensor wires. DO NOT run garage door opener at this time. When the light beam is obstructed or misaligned while the door is closing, the door will reverse and the garage door opener lights will flash ten times. If the door is already open, it will not close. The force is adjusted automatically when you program the travel.

If a forced opening is detected, it automatically reactivates the opener to the closed position It displays time, inside garage temperature, and important system status messages, making it easier to maintain your system. It's the only remote that automatically lights up as you bring your hand nearby, making finding the right button easy even in the dark. For a garage door company I feel Doortec by Brent Trotter is by far the best. They showed up on time, had my garage door repaired in 45 min. The doors are aesthetically pleasing and have improved the curb appeal of my home. Thank you, Mr. Brent Trotter and your dedicated employees for a job well done. Kristy S. Highly Recommended. As with most electrical issues I felt I needed a professional option rather than messing with it myself. When I called the gentleman I spoke torather then immediately setting up a costly service call walked me through a potential fix. It worked!!!! And though it might have cost you a service call, the customer service and character I experienced has made me a loyal customer. As well the answering machine is not working. It is switched to OFF. I tried to switch it to ON in the answer machine set up menu but the option is no longer available on the menu. I think that the settings on the 8355 have probably become messed up since the phone was not used for a long time waiting for the NBN connection. This phone system was a good unit and I would like to have it functioning properly again. I would appreciate if you could please help me solve the problems of the fuzzy recorded message and the answer machine that is no longer working. Recently we were connected to the NBN. The ISP made a mess of the settings and our phone was finally functioning again yesterday. The sound over the connection is OK so this morning I recorded a new outgoing message on the answerphone.

But I was surprised the play back on the base station is very disappointing. It is fuzzy and distorted. However when I record the message using the hand set the message sounded better. Any ideas why this is happening. I searched for the microphone on the answering system base station but I could nor see it. Where is the microphone located. Maybe it is be partially covered by dust. Does some internal setting now needs to be adjusted. Because of the location of the nbn connection box location in the house, the Uniden base is in an area that makes it difficult to hear the Caller ID Announcement in the main living area. Is there some means to overcome this difficulty as I doubt that it is possible to have the announcement transmitted to a nearby handset or connected mobile phone 1 like Share More 3 answers Uniden A. Uniden 10 months ago Hi Jeb, Unfortunately, for your model, the Caller Announce feature is only available from the base station. Why did the call just now

come in as unavailable. Like Share More 2 answers Uniden A. Uniden 1 year ago Hi Dee, If Caller ID is activated on the line all incoming numbers should be displayed. If you want phonebook contacts to display their names on incoming calls, the number has to be first stored in the Phone Book. Any numbers that arent stored in the Phone Book will show up as Unavailable. Unfortunately, as service providers have now changed their support settings for the Caller ID feature, it is now required to have all landline numbers stored in your phonebook to also include the area code. This applies even if the landline numbers are local. Once this is done, the numbers should display the relevant assigned names and will not show as Unavailable anymore. I am looking to purchase a Uniden phone. Its location that has to near by the NBN box. Do really want missed calls recording to be silent. Can the message system to set up so that when a missed call is being recorded the message is silent to others nearby Q2.

http://www.infranetltd.com/wp-content/plugins/formcraft/file-upload/server/content/files/1627553978025d---brother-p-touch-1010-instruction-manual.pdf

I currently have a phone system that enables me to play recorded calls from the various cordless handsets without going to the base station. Does the Uniden have this capability Q3. What is the range that a cordless handset will work away from the phone base. Like Share More 1 answer Uniden A. Uniden 1 year ago Hi Allan, Q.1 Yes, we have the feature called Call Screen. This feature is available on most of our Integrated Answering Machine models. Q.2 Yes, we have models where you can retrieve messages on the individual handsets and the answering machine base. Q.3 Generally, 150m line of sight. The XDECT8355 model accommodates your 3 queries. You can place an order for the additional handset on the following link; You can register up to 12 handsets in total to your main base. 1 like Report Heather 1 year ago Thanks Uniden for prompt answer I did find what I was looking for in the instruction manual, but thank you anyway, your customer service is great. Just another comment I have a long block of land and house is steel construction and outside shed is all steel but tried one of my handsets to make sure it worked before I bought an extra did need repeater which came with original pack and it works great. My old Uniden didn't have any where the range this has now can ring my son instead of walking out in weather to contact him. Great unit can't find any faults. Like Report Uniden A. Uniden 1 year ago Hi Heather, Thank you kindly for your review. We appreciate the time you have taken to provide feedback and wish you all the best with your Uniden product. Judy Like Share More 1 answer Maggie 3029 2 years ago Open the menu and select answering set up Set the number of rings to 6,9,12 Toll Saver makes the system answer after 2 rings. People say they have sent me messages but the phone says no messages Like Share More 2 answers Maggie 3029 2 years ago Have you actually tried to leave yourself a message to see what happens.

If your answer machine is switched on then you should be receiving the messages ok. If its not I am wondering if they are actually leaving messages on something like Telstra Message Bank. All I can say is try it yourself and see but first make sure your answering machine is switched on. See page 41 of the manual. Open Menu, and select answering setup to customise it to your preferred settings. Like Report keith c. 1 year ago moved house and 2 extension handsets, now fully charged, say check base power and out of range and are obviously not working, how do I reconnect to the base. Like Share More 2 answers jane 2 years ago Sorry no idea havent tried that yet google did help with getting rid of the computer voice so maybe it can help with this Do wish instructions with phone were more useful Like Report Maggie3029 2 years ago On page 17 of the manual it says to put a call on hold and start a call transfer. Doesn't tell you how to do that as there is no hold button. Fast forward to page 27 and there you have it. The Uniden 8355 manual is an absolute disgrace. Why all that information isn't on the same page I'll never know. This is the worst instruction manual I've ever come across. Hope this works for you. Like Share More 2 answers Maggie3029 2 years ago From the handset press menu silver button between phonebook and caller ID Scroll to handset setup

Scroll to ringer tones Select As you highlight each tone the phone plays a sample when you hear the one you want press menuselect Like Report PJK 2 years ago I had no problem changing the ring tone on the hand sets my problem is the BASE it also rings and rings a different tone to the hand set used on it. All I can do so far is to turn the BASE ring down to silent. ProductReview.com.au has affiliate partnerships.
