Reviewed Apr 02nd, 2018 by RMBradley Great receiver. Bought mine new in 1976 and still use it as my garage receiver today. Have to deoxid the switches every now an then but still sounds great. In comparison with Marantz it is less musical in my ears. But a good vintage guy. Price 130150 bucks. Reviewed Nov 16th, 2016 by thisisforlife Very clean sound and beautiful design. Comments I sure hope theyre in good working condition. I can hardly wait. Best regards, M. I have a Yamaha CDX590 CD player and it skips on some CDs original CDs, these CDs play without problems on my other CD players. I have changed the laser unit KSS210A but this didnt solve the problem. When I turn the player upside down, it plays the problematic CDs without a problem. Thats why I think the laser needs adjustment. Here is a picture of the PCB. It didnt help. Mode 1 only a short blink of two horizontal dashes on the display and thats it. Mode 3 seems to be very short as mode 1. I think Im missing something. Maybe someone did this or even serviced Yamahas in an official service and can provide information how to adjust the laser Or maybe the problem is not the laser. Szervusztok!
